

Leading In

Science fiction often tells us about science or machines of the future, and it shows how they can change people's lives. For example, Tezuka Osamu, in his manga, created a little robot boy who is very powerful and has feelings like humans. Let's find out how other writers saw the future.

指導手順

(1) リスニング

(2) 英問英答 (例)

Q1 What does science fiction often tell us?

— It often tells us about science or machines of the future.

Q2 How do you think science or machines of the future will change our lives?

— I think they will make our lives more comfortable.

Q3 Could you give some examples concretely?

— Yes. If self-driving cars are developed perfectly, traffic accidents will be reduced. など
