

資料⑦ Lesson 3 Predictions of the Future

全体の Summary

Isaac Asimov, an American writer and a scientist, made some predictions back in 1964 about our lives today. We can see that a lot of his predictions have come true: () (), () (), the use of () (), and () that do various tasks at home. Similarly, he made some predictions that have partially come true, like () under the sea, () (), and large () stations. Another writer, Arthur C. Clarke, and some of the world's top scientists have also made predictions about the future. Clarke predicted wireless (). Scientists predicted computers everywhere and () (). In order to make such predictions come true, we should understand the importance of science and learn to use it in good ways.
